

NGEDBUS CORAL GARDEN, WALL & CORNER

NGEDBUS CORAL GARDEN, WALL & CORNER

Dive Site:

- At Ngedbus Coral Garden many deep canyons and crevices cut the slope and are home to a large variety of marine life
- There is usually no current present. Visibility is best on an incoming tide
- A gentle coral slope drops from the top of the reef down to 75 feet, before it changes to a ridge of broken corals and sand
- Ngedbus Wall is a sheer reef drop
- At Ngedbus Corner, a small plateau at around 25 feet extends out from the wall

Marine Life:

- Crocodile fish, Stingrays, Cuttlefish & the Ornate Eagle Ray are commonly seen
- Schools of Black Tip Reef Shark usually come up close at the Coral Garden
- Many Gray Reef Sharks patrol the walls and circle around the corner
- Along the reefs edge Pyramid Butterfly fish and myriads of Red-toothed Triggerfish congregate
- Schools of Barracuda, Rudderfish, Snappers, Napoleon Wrasse, Lion fish, Emperors, Puffers, Turtles, as well as big pods of Spinner Dolphins can be seen
- Sea fans, Whip & Wire coral, healthy soft coral
